EDUCATION

Independent University, Bangladesh — Dhaka, Bangladesh
Bachelor of Science in Computer Science, Minor in Communications | CGPA: 3.17 — *Jan 2022 – May 2026*

- Relevant Coursework: Data Structures; Algorithms; Database Management; Web Development; Interactive Media
- Activities: Winner, Algorithm Project Showcase, TechFest; Paper Presenter, IEEE ICOIICS 2025

Mastermind International School, Chittagong — Chittagong, Bangladesh
CAIE A Levels — *June 2021*

- Academics: Physics; Mathematics

EXPERIENCE

Riseup Labs — Dhaka, Bangladesh
Software Engineering Intern — *Sep 2026 – Present*

- Took the in-house Asset & Hardware Management System (AHMS) from PRD to working V1: gathered requirements, wrote PRDs, designed the database schema and architecture, and developed most of its 18 backend modules and 37 screens.
- Built an async FastAPI, SQLModel and PostgreSQL backend with JWT/Argon2 auth and five-role access control, plus a Vue 3 and TypeScript frontend with live notifications over Server-Sent Events.
- Containerized the stack with Docker Compose and gated changes with 148 pytest and 66 Playwright end-to-end tests.

Team GY6 — Remote
Full-Stack Developer Intern — *Feb 2026 – July 2026*

- Built and maintained Next.js websites and a full WordPress/WooCommerce store for clients in Australia and the UK.
- Developed n8n automation workflows to streamline client operations and gathered project requirements through direct communication with international clients.
- Shipped full-stack features across frontend, backend and database work, contributing to company codebases and engineering standards through planning, testing, debugging and deployment. Term extended by one month beyond the original agreement.

LEADERSHIP AND PROJECTS

Care Operations Automation System
Tech: ClickUp, n8n, JavaScript, REST APIs, Open-Meteo, SMTP

- Built an operations system for an 8-resident assisted living facility covering recurring caregiver task boards, medication administration with dose-time reminders and refusal logging, a sales CRM, and a reporting dashboard.
- Re-architected the data model around tags, statuses and checklists after hitting the platform's field-value ceiling, delivering the complete build within 18 of 60 available uses.
- Developed an 11-node n8n workflow that queries the ClickUp API on a schedule, groups visiting relatives into family units, retrieves location-specific forecasts, and delivers templated HTML briefs over SMTP with an audit trail written back to each record.

ProctorLess, Privacy-First Online Assessment Platform
Tech: Next.js, TypeScript, Supabase, PostgreSQL, Tailwind CSS

- Built full-stack app for secure exams without surveillance. Added role-based dashboards for students, professors and admins.
- Created seating-aware question distribution to curb cheating. Added AI grading, real-time monitoring, and a Chrome extension for session integrity detection.
- GitHub: github.com/Taif6612/proctorless-app

Senior Mode, Accessibility Chrome Extension
Tech: TypeScript, React, WXT, Vite

- Built extension for better web access for elderly and visually impaired users. Added high-contrast mode, text scaling and link highlighting.
- Used DOM manipulation to override site styles. Added unit and end-to-end testing for reliability.
- GitHub: github.com/Taif6612/senior-mode-extension

AHMS, Asset & Hardware Management System
Tech: Python, FastAPI, SQLModel, PostgreSQL, Redis, Vue 3, TypeScript, Naive UI, Pinia, Docker Compose, pytest, Playwright

- Built a full asset lifecycle system for Riseup Labs: registry with QR stickers and scan lookup, handovers, returns and transfer approvals, repairs and warranty, loss and damage reports, physical audits and exit clearance.
- Added a dashboard, activity log, 13 CSV/Excel/print reports and a 12-hourly employee sync from the company HR system.

PUBLICATIONS

Drought-Sensitive Machine Learning for Robust Water-Level Forecasting in the Chitra and Nabaganga River Basins
IEEE ICSADL 2026

- Proposed a drought-aware multi-river ML framework using ensemble models to capture complex hydroclimatic relationships.

Machine Learning Modeling for Predicting Water Level in the Nabaganga River, Bangladesh
IEEE ICOIICS 2025

- Compared ML models (CatBoost, XGBoost, Random Forest, LightGBM, MLP); CatBoost performed best ($R^2 = 0.998$).

TECHNICAL SKILLS

Frontend: HTML5, CSS3, JavaScript, TypeScript, Next.js, Vue 3, Tailwind CSS | **Backend:** Node.js, PHP, FastAPI
Databases: MySQL, PostgreSQL (Supabase), Redis | **Automation:** n8n, ClickUp, workflow design, REST API integration
DevOps and Tools: Git, GitHub, GitHub Actions (CI/CD) | **UX and Accessibility:** User-Centered Design, Accessibility Principles
AI/ML (Supportive): Python, scikit-learn, XGBoost | **Testing and Containers:** pytest, Playwright, Docker Compose
